COSCH stimulates collaborative research, establishes good practice and simplified uses of high-resolution optical techniques. COSCH research is undertaken by 5 working groups (WG):

- WG 1: Spectral object documentation
- WG 2: Spatial object documentation
- WG 3: Algorithms and procedures
- WG 4: Analysis and restoration of Cultural Heritage surfaces and objects
- WG 5: Visualisation of Cultural Heritage objects and its dissemination

With this conference COSCH responds to questions raised through the complexity of documentation processes and their appropriateness for various application scenarios in the field of conservation and preservation of cultural heritage. Modern technologies offer many possibilities to collect data to shape and appearance of cultural objects. However, what are the best ways to answer typical questions of cultural heritage documentation? In order to do first steps towards a better understanding of this multifaceted field equally addressing interests of end user and technicians this workshop will introduce into concepts to collect and structure knowledge related to heritage documentation tasks.
